Safety notes

- The device must not be used outside the specified field of application, especially not in aircraft or in any other airborne means of transport.
- Outdoor application: only possible in case that no (sea) water, snow, ice, insolation or aggressive gases interfere directly with the actuator and that is ensured that the ambient conditions remain at any time within the thresholds according to the data sheet.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- Cables must not be removed from the device.
- To calculate the torque required, the specifications supplied by the damper manufacturers concerning the cross-section, the design, the installation site and the ventilation conditions must be observed.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.

Product features

Simple direct mounting	Simple direct mounting on the damper shaft with a universal shaft clamp, supplied with an anti-rotation device to prevent the actuator from rotating.
Manual override	Manual override with push-button possible (the gear is disengaged for as long as the button is pressed or remains locked).
Adjustable angle of rotation	Adjustable angle of rotation with mechanical end stops.
High functional reliability	The actuator is overload protected, requires no limit switches and automatically stops when the end stop is reached.
Flexible signalization	With adjustable auxiliary switch (0...100%)

Auxiliary switch settings

Note: Perform settings on the actuator only in deenergised state.

- 1 Gear disengagement**
 Holding button pressed down: Gear is disengaged.
 Manual override is possible.
- 2 Spindle clamp**
 Turn until edge line **A** displays the desired switching position of the actuator and release button **1**.
- 3 Auxiliary switch**
 Turn rotary knob until the arrow points to the vertical line.
- 4 Cable**
 Connect continuity tester to S1 + S2 or to S1 + S3.
 If the auxiliary switch should switch in the opposite direction, rotate the auxiliary switch by 180°.
