ACVATIX™

## 2-port and 3-port valves PN 16

VVP45..  
VXP45..  
VMP45..

- Bronze CC499K valve body
- DN 10...DN 40
- $k_{vs}$  0.25...25m<sup>3</sup>/h
- Flat seal male threaded connections G...B to ISO 228-1 for
  - Sets of ALG.. screwed fittings with threaded connection (available from Siemens)
  - SERTO compression fittings, type SO 00021.. (available from suppliers to the trade)
- Manual adjuster
- Can be equipped with SSB.. or SSC.. electromotoric actuators

### Use

- In ventilation and air-conditioning systems for water-side terminal unit control in closed circuits, e.g. induction units, fan coil units, small reheaters and small re-coolers, for use in:
  - 2-pipe systems with one heat exchanger for heating and cooling
  - 4-pipe systems with two separate heat exchangers for heating and cooling
- In closed-circuit zone heating systems, e.g.
  - Individual floors in a building
  - Apartments
  - Individual rooms

## Type summary

VVP45.. 2-port	VXP45.. 3-port	VMP45.. 3-port with T-bypass	DN	Connection	$k_{vs}$ A → AB [m <sup>3</sup> /h]	$k_{vs}^{1)}$ B → AB [m <sup>3</sup> /h]	$S_v$

VVP45.25-6.3	VXP45.25-6.3			G 1¼B	6.3	4.40	
VVP45.25-10	VXP45.25-10		G 1½B	10			
VVP45.32-16	VXP45.32-16		32	G 2B	16		
VVP45.40-25	VXP45.40-25		40	G 2¼B	25		

1) Valid for 3-port version only

DN = Nominal size

$k_{vs}$  = Nominal flow rate of cold water (5...30 °C) through the fully open valve ( $H_{100}$ ) by a differential pressure of 100 kPa (1 bar)

$S_v$  = Rangeability  $k_{vs} / k_{vr}$

$k_{vr}$  = Smallest  $k_v$  value, at which the flow characteristic tolerances can still be maintained, by a differential pressure of 100 kPa (1 bar)

## Accessories

Product no.	Stock no.	Description
ALG..2	ALG..2	Set of 2 fittings with threaded connections for 2-port valves, consisting of 2 union nuts, 2 discs and 2 flat seals. ALG..2B are brass fittings, for media temperatures up to 100 °C.
ALG..2B	S55846-Z1..	
ALG..3	ALG..3	Set of 3 fittings with threaded connections for 2-port valves, consisting of 3 union nuts, 3 discs and 3 flat seals. ALG..2B are brass fittings, for media temperatures up to 100 °C.
ALG..3B	S55846-Z1..	

## Ordering

Example:

Product number	Stock no.	Description	Quantity
VVP45.15-2.5	VVP45.15-2.5	2-port valve	20
ALG142	ALG142	Set of 2 fittings	20
VMP45.20-4	VMP45.20-4	3-port valve with T-bypass	10
ALG152B	S55846-Z100	Set of 3 fittings	20

For 3-port valves with T-bypass VMP45..order two sets of 3 screwed fittings.

Delivery

Valves, actuators and accessories are packed and supplied separately.

Spare parts, rev. no.

See overview, page 10.

## Equipment combinations

<sup>1)</sup> Connecting thread pipe side: Internally threaded

<sup>2)</sup> Usable up to maximum medium temperature of 100 °C

$\Delta p_{max}$  = Maximum permissible differential pressure across valve's control path, valid for the entire actuating range of the motorized valve.

$\Delta p_s$  = Maximum permissible differential pressure at which the motorized valve will close securely against the pressure (close off pressure).

## Actuator overview

Type reference	Operating voltage	Positioning signal	Positioning time	Positioning force	for valves with $k_{vs}$	Data sheet
SSB31..	AC 230 V	3-position	150 s	200 N	to 6.3 m <sup>3</sup> /h	N4891
SSB81..	AC 24 V					
SSB61..	AC/DC 24 V	DC 0...10 V	75 s			
SSC31..	AC 230 V	3-position	150 s	300 N	from 4 m <sup>3</sup> /h	N4895
SSC81..	AC 24 V					
SSC61..	AC/DC 24 V					

$\Delta p_{max}$  = Maximum permissible differential pressure across the valve's control path, valid for the entire actuating range of the motorized valve

$\Delta p_{V100}$  = Differential pressure across the fully open valve and the valve's control path by a volume flow  $V_{100}$

$\dot{V}_{100}$  =

100 kPa = 1 bar  $\approx$  10 mWS

1 m³/h = 0.278 l/s water at 20 °C

**Example:**

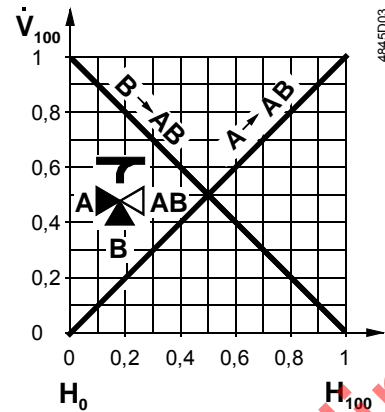

1	$\dot{V}_{100}$	=	0.083 l/s
2	$\Delta p_{V100}$	=	9 kPa
3	→ $k_{vs}$ -value	=	1.0 m³/h

**Valve flow characteristic**

V..45.10-0.25 to V..45.25-6.3

V..P45.25-10 to V..P45.40-25

The  $k_{vs}$ -values in bypass B for valve types V..45.10-0.25 to V..45.25-6.3 represent only 70 % of the  $k_{vs}$ -value in the straight-through control path A → AB (for other types 100 %). This compensates for the flow resistance of the heat exchanger or radiator, so keeping the overall flow rate,  $\dot{V}_{100}$  as constant as possible.

**Engineering notes**

Valve construction	Valve series	Valve flow in control mode			Valve stem	
		Inlet A	Inlet B	Outlet AB	Retracted	Extended
<p>2-port valves</p>	<p>VVP45..</p>	variable		variable	A → AB opens	A → AB closes
<p>3-port valves</p>	<p>VXP45..</p>	variable	variable	constant	A → AB opens B → AB closes	A → AB closes B → AB opens
<p>3-port valves with T-bypass</p>	<p>VMP45..</p>	variable	variable	constant	A → AB opens B → AB closes	A → AB closes B → AB opens

**Warning!**

The direction of flow **MUST** be as indicated by the arrow, i.e. only from A → AB and B → AB.

The 3-port valve types VXP45.. and VMP45.. may only be used in mixing applications

We recommend installation in the return pipe, as the temperatures in this pipe are lower for applications in heating systems, which in turn, extends the stem sealing gland's life.

Recommendation: Always use a strainer upstream of the valve to increase the valve's functional safety.

## Mounting notes

---

Both valve and actuator can easily be assembled at the mounting location. Neither special tools nor adjustments are required.

The valve is supplied with Mounting Instructions 4 319 9526 0.

Orientation

## Commissioning notes

---

**Commission the valve only if the manual knob or actuator has been mounted correctly.**

**Manual adjustment**

The straight-through path A → AB can be opened electrically via the actuator, or manually. With three-port valves, this throttles or closes bypass B.

Manually, path A → AB can only be opened to 70 % (bypass closes to 30 %). The valves with  $k_{vs}$  values 10, 16 and 25 can be fully opened whereas the bypass can be fully closed.

The valves are closed by a return spring.

## Maintenance

---

**Warning**

V..P45.. valves require no maintenance.

When doing service work on the valve / actuator:

- Deactivate the pump and turn off the power supply
- Close the shutoff valves
- Fully reduce the pressure in the piping system and allow pipes to completely cool down

If necessary, disconnect the electrical wires.

Before putting the valve into operation again, make certain the manual knob or the actuator is correctly fitted.

**Stem sealing gland**

The stem sealing gland cannot be exchanged. In the case of leakage, the entire valve must be replaced. Contact your local office or branch.

**Disposal**

Do not dispose of the device as household waste.

**Warning**

Due to the tensioned spring return, valve disassembly may result in flying parts causing possible injury.

Only authorized staff may disassemble valves with tensioned spring return!

**Disposal**

- Special handling of individual components may be mandated by law or make ecological sense.
- Observe all local and currently applicable laws and regulations.

## Warranty

The technical data given for these applications is valid only in conjunction with the Siemens actuators as detailed under «Equipment combinations».

All terms of the warranty will be invalidated by the use of actuators from other manufacturers.
